

Company Profile

Siemens (Berlin and Munich) is a global powerhouse in electrical engineering and electronics. The company has 405,000 (as of September 30, 2009) employees at 1,640 locations around the globe working to develop and manufacture products, design and install complex systems and projects, and tailor a wide range of services for individual requirements.

With a presence in some 190 countries, Siemens can offer customers fast, local, tailor-made solutions. And that gives Siemens a decisive competitive edge.

SIEMENS

„We have to control our corporate law portfolio at 100 % at full transparency, to manage daily changes and to provide reliable information about the current investment stock for the entire group for the strategic and operative management, the intern and extern reporting and as an integrated master data generator for downstream systems. zetVisions Insider is the technical base for our Corporate Investment Management – competent and reliable.“

Bernhard Bieler
Vice President Subsidiary Management
Siemens AG

Motivation

- Standardized Software with international market expertise
- Extensive functionality
