

zetVisions CIM at the SEW-EURODRIVE Group

Company Profile

SEW-EURODRIVE, founded in 1931, is a globally leading specialist for drive technology with a worldwide turnover of over 3 billion € (2017/18).

The product spectrum includes gear motors and frequency converters as well as complex drive solutions from a single source.

With currently more than 17,000 employees the owner-managed family business headquartered in Bruchsal is represented in 50 countries. In total, the SEW-EURODRIVE Group is composed of about 300 sites and 80 operative companies.

„With zetVisions CIM and zetVisions ANYWHERE our efficiency improved a lot. Not only is the data quality considerably higher than before, but also the time saving when generating overviews and organizational charts is clearly noticeable.

A significant added value is provided by zetVisions ANYWHERE. More than 10,000 of our employees can access relevant data from zetVisions CIM at all times, from anywhere.”

Lucas Trunk

**Assistant to Group Managing Director
SEW-EURODRIVE GmbH & Co KG**

Initial Situation

- Increasing internationalization leads to increasing requirements
- Information partially exists only conditionally
- No standardized data maintenance → Consequence: mediocre data quality
- High expenditure of time for the generation of organizational charts or company overviews
- Extensive examination of legal requirements for the appointment of the functions/management boards
- No consistent filing of documents

Motivation

- Global Single Point of Information
- Higher speed for inquiries (generation of organizational charts, banks, management requests, ...)
- The possibility of providing information for all the employees
- Archiving of documents
- Achieve an improvement of data quality

Benefits

- There is a Single Point of Information
- International preliminary selection of legal forms → Better data quality through reduced sources of error
- Time saving of about 80 % for generating overviews and organizational charts
- Faster decision-making
- Central data entry, decentralized responsibility
- Integrated document management with interface to the archive system
- Higher efficiency
- Compliance is given
- Mobile use of zetVisions CIM through more than 10,000 users is possible
